THE THREE CONCORDS EXPLAINED.

- Q. How many concords are there?
- A. There are three concords, or agreements, in Latin:
 1. Between the nominative case and the verb.
 2. Between the substantive and the adjective.
 3. Between the antecedent and the relative.

THE FIRST CONCORD.

- Q. What is observable in the first concord?
- A. A verb agreeth with its nominative case in number and person.
- Q. How do you find out the nominative case to a verb?

A. In order to find out the nominative case, ask 'the question *who*, or *what*? with the verb; and the word that answereth to the question, is the nominative case to the verb; as, *who reads? who regards not?*

The *master* reads, but *ye* regard not.

Præceptor legit, vos verò, negligitis.

Q. What is sometimes the nominative case to a verb?

A. Sometimes an infinitive mood, or a sentence, is the nominative case to a verb; and sometimes the substantive to an adjective; and in this case the adjective, or the relative, must be in the neuter gender: as,

Diluculò surgere saluberrimum est.

To rise betimes in the morning is most wholesome.

In tempore veni, quod omnium est primum.

I came in season, which is the chief thing of all.

Q. When a sentence consists of two, or more, nominative cases singular, what number must the verb be?

A. Many nominative cases singular have a verb plural, which agrees with the nominative case of the most worthy person: *And note*, that the first person is more worthy than the second, and the second more worthy than the third: as,

Ego et tu sumus in tuto.

I and thou are in safety.

Q. Of what case is the substantive that follows a verb?

A. The substantive which cometh next after the verb, and answereth to the question *whom*, or *what*? made by the verb, shall commonly be the accusative case; except the verb, by some particular rule, requires another case after it: as,

Si cupis placere magistro, utere diligentia.

If you desire to please the master, use diligence.

Obs. In this example, *magistro* is the dative, and *diligentiâ* the ablative case, according to the rule of Syntax.

THE SECOND CONCORD.

Q. How do you find out the substantive to an adjective?

A. When you have an adjective, ask this question, *who*, or *what*? with the adjective; and the word that answereth to the question, shall be the substantive to the adjective.

Q. How does an adjective agree with its substantive?

A. The adjective, whether it be a noun, pronoun, or participle, agreeth with its substantive in case, gender, and number: as,

Amicus certus in re incertâ cernitur.

A sure friend is tried in a doubtful matter.

Q. What must be noticed with regard to gender?

A. The masculine gender is more worthy than the feminine, and the feminine more worthy than the neuter. *Also note*, that in things without life, the neuter gender is most worthy: and in this case, though the substantive, or antecedent, be of the masculine or feminine gender, and not of the neuter, yet may the adjective, or relative, be put in the neuter gender: as,

Arcus et calami sunt bona.

The bow and arrows are good.

Arcus et calami quæ fregisti.

The bow and arrows *which* thou hast broken.

Q. Of what number must the adjective be when it relates to many substantives?

A. Many substantives singular will have an adjective plural; which adjective shall agree with the substantive of the most worthy gender: as,

Rex et regina sunt beati.

The king and the queen are blessed.

Q. Of what gender must an adjective be to agree with the word *thing*?

A. When in English the word *thing* is put with an adjective, you may in Latin leave out the substantive, and put the adjective in the neuter gender: as,

Multa me impediērunt.

Many things have hindered me.

THE THIRD CONCORD.

Q. How do you find out the antecedent to a relative ?

A. When you have a relative, ask this question, *who*, or *what* ? with the verb ; and the word that answereth to the question, shall be the antecedent to the relative.

The relative agreeth with its antecedent in gender, number, and person : as,

Vir sapit, qui pauca loquitur.

The man is wise, *who* speaketh few words.

Q. How does a relative agree with its antecedent ?

A. If the relative refers to two antecedents, or more, then it shall be put in the plural number ; as,

Tu multùm dormis, et sæpè potas ; quæ ambo sunt corpori inimica.

Thou sleepest much, and drinkest often ; *both which* things are hurtful to the body.

Q. Is not the word *that*, sometimes a relative ?

A. When the English word *that* may be turned into *who*, or *which*, it is a relative ; otherwise it is a conjunction, expressed in Latin by *quòd*, or *ut* ; and in making Latin, the conjunction may be put away, by turning the nominative case to the verb into the accusative, and the verb into the infinitive mood : as,

Gaudeo quòd tu benè vales ; or, gaudeo te benè valere.

I am glad *that* thou art in good health.

Find the English of the following.

Ego vidēbo—tu doces—agricōla aravērit—docebimus—milites pugnabant—pia filia amat—mater bonam filiam laudabat—boni puēri erudiuntur—Deus est, qui nos videt—literæ quas scripsisti—signum quod datum est—mutamini—bona filia amatur.

Questions for examination.

- Q. What question do you ask to find the nominative ?
- Q. Is a substantive or pronoun always the nominative to a verb ?

- Q. Do all verbs take an accusative case after them ?
